Mobile: +91-9836670003

SKILLS

Languages: Python, Bash Scripting, C++
Technologies/OS: Linux OS (Kali, Ubuntu), Windows OS, Cryptography, Networking
Tools: Nmap, Wireshark, John the Ripper, Metasploit
Soft Skills: Team Player, Critical thinking, Adaptability

PROJECTS

Python-Based Vulnerability Scanner | Github — Aug 2025

- Built a Python-based vulnerability scanner to identify common web security issues such as weak endpoints, input validation flaws, and basic misconfigurations.
- Implemented automated scanning logic and custom test cases to efficiently detect potential vulnerabilities across target URLs.
- Utilized Python, HTTP protocols, and fundamental cybersecurity concepts to create a simple and effective vulnerability assessment tool.

Tech: Python, Requests, HTTP Protocols, Networking Basics, Linux

GenPass – Privacy-First Password Generator | Github — Jun 2025

- Designed a privacy-first password generator to create strong, secure, and unpredictable passwords while ensuring no user data is stored or transmitted.
- Implemented secure password generation logic with customizable parameters (length, symbols, complexity), resulting in enhanced user control and improved password strength.
- Utilized Python, randomization techniques, and core security principles to develop a lightweight and reliable password generation tool.

Tech: Next.js, TypeScript, Tailwind CSS, Web Crypto API

TRAINING

Mastering Linux System Administration | RHCSA — July 2025

- Completed hands-on training on Linux OS fundamentals, system administration, networking, Bash scripting, and cron scheduling.
- Gained practical experience in user & file management, process control, service configuration, essential Linux commands, and task automation using cron jobs.
- Strengthened system administration and troubleshooting skills through hands-on system setup, automation, and deployment tasks.

CERTIFICATION

- Cloud Computing | NPTEL | Certificate — Nov 2025

CERTIFICATES

- Mastering Linux System Administration | Lovely Professional University | Certificate — Jul 2025
- Introduction to Hardware and Operating Systems | Coursera | Certificate — Nov 2024

ACHIEVEMENTS

- Practiced DSA problems on LeetCode, strengthening algorithmic thinking across arrays, strings, recursion, hash maps, trees, graphs, and dynamic programming. — May 2025
- Completed C, C++, and DSA tracks on LPU Colab (NeoColab), covering pointers, OOP, recursion, and advanced data structures. — Dec 2024
- Completed the full DBMS coding track on ProeBox, working with SQL, PL/SQL, joins, subqueries, triggers, and real-world database challenges. — Nov 2024

EDUCATION

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 5.82 — August 2023 - Present

Kendriya Vidyalaya ASC Centre — Bengaluru, Karnataka
Intermediate; Percentage: 82% — April 2021 – March 2022

Kendriya Vidyalaya Barrackpore (AFS) — Barrackpore, West Bengal
Matriculation; Percentage: 79% — April 2019 - March 2020
